Subject: Sufco 4LPE Longwall mining in East Fork Box Canyon

Sufco has completed mining under the stream in the 4LPE longwall panel in the East Fork Box Canyon. Mining under the stream occurred from January 10 to March 21, 2005. (See attached map)

A field trip was conducted on March 3, 2005 by Sufco & Nelco personnel. Snowmobiles were used to gain access on top and snow shoes were used to climb down into the canyon. Water was flowing between EFB 06 and EFB 08 monitoring points in the few areas that the stream was visible and not buried with snow. The snow was too deep and hazardous to go any farther down the canyon. (See attached pictures)

Mike
